DETAILED ACTION

This office action is in response to application 10/074,914 and amendment filed on 11/19/2003. Claims 1-66 remain pending in the application.

Allowable Subject Matter

1. Claims 1-66 are allowed over prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The examiner finds applicant's arguments persuasive.

The prior art of record fails to teach or suggest or render obvious:

A method for design analysis of a component, the method comprising:

generating a finite element model of the component; receiving user-defined parameters defining a plurality of variables associated with the component and including at least one thermo-mechanical environment parameter; subjecting the finite element model of the component to at least one environmental load; determining a stress response of the finite element model based upon the at least one environmental load; determining whether the stress response is within pre-selected limits; and prompting modification of at least one of a design of the component and at least one user-defined parameter and regenerating the finite element model if the stress response is outside of the pre-selected limits, wherein prompting modification comprises determining a part of the component that is likely to fail and a cause of the part failure and indicating at least one of a design of the component and at least one user-defined parameter to mitigate the cause of the failure.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
